

Welcome to our simulated factory/distribution warehouse! This is your opportunity to see first-hand how you can completely automate all your business operations. Ask questions in an informal setting. Hear case studies of actual system implementation experiences from peers in your industry. Discuss your company's unique needs one-on-one with our business system specialists.

Experience

Speak one-on-one with our business system specialists in an informal setting to see how Geneva Business Management Systems (GBMS) and Microsoft Business Solutions meet your specific needs. See how the new Demand Planner tool from Microsoft can enhance your operating and purchasing functions.

Learn

Understand how mid-sized businesses can employ the same powerful business technology as their larger counterparts - without the big-market price tag. Attend informative breakout presentations with industry experts on how you can quickly implement a cost-effective web-based "one-stop shop" system.

Interact

Walk through our mock facility to see the latest in remote wireless communication for end-to-end warehouse management. Network with fellow operations professionals.

Our bar code solutions showcase

- Sales Order Processing - Facilitate your entire order processing life cycle and related functions.
- Purchase Order Processing - Manage requisitions, PO's, vendor returns, inventory replenishment, an unlimited number of vendor records, and more.
- Warehouse Management - Handle picking, packing, put away, shipping, receiving, inspection, inventory moves, serial/lot tracking, and more.
- Data Collection - Fully integrate data collection technologies, such as bar code scanning/printing and wireless mobile data collection.
- Attendance & Labor - Collect employee timekeeping and labor data for job costing.
- Manufacturing & Shop Floor Control - Manage work order entry, operation completion, and work order delivery.
- Document Imaging and EDI - Maximize operational ease and speed with the latest Internet capabilities.
- Workflow Automation - Create an integrated centralized web-based process that efficiently automates tasks.
- Radio Frequency Identification (RFID) - Utilize automatic identification and data capture to easily track moving goods.
- Integrated Accounting - Fully integrate with Microsoft Business Solutions - Great Plains Accounting to effectively manage budgets, invoices, time and expense reporting, and project performance.

Our affordable user-friendly systems fully integrate all aspects of your business—distribution, manufacturing, warehouse management, and accounting.

Total Warehouse Management for Distributors and Manufacturers.

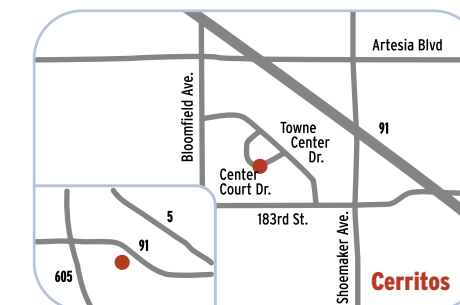

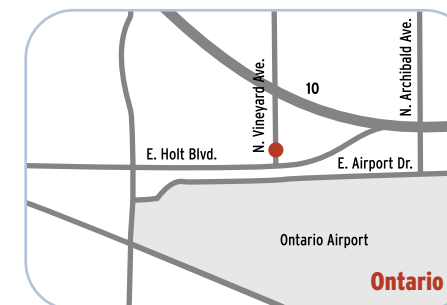

Schedule of Events

- Factory simulation tours, hands-on demonstrations, and open discussion begin at 8:00 a.m. and run throughout the day until 5:00 p.m.
- Special case study presentations begin at noon and end by 2:00 p.m.

Our system specialists will personally guide you, facilitate product demonstrations, and answer your questions throughout your tour. The day's schedule is open; feel free to arrive and depart at your convenience. However, we recommend early registration to ensure our personal attention, as attendance is limited. Plan about three hours for a complete tour, presentations, and consultation during your visit. **Attendees will receive a complimentary CD collection of strategic white papers on effective inventory management strategies for the distribution industry.**

Dates and Locations

- Choose from two dates and locations:
